

I really enjoy XM Satellite Radio. It is wonderful because I can be driving down the road and listen to the news, traffic, and the weather channels for the surrounding areas and I don't have to sit at home and watch it on tv. I do not get any thing out of my local stations because most of them just sit around and talk about stuff I am not interested in and with XM radio, you can get to the point...if I want to listen to music, I can and if I want to listen to the weather, I can. I feel that if we pay for these services, it should not be up to anyone (even the NAB) what we are allowed to hear!!!!!!!!!!!!
